

# GREASEGUARD®

## GREASE TRAP & DRAIN CLEANER

MPI Approved C 64 (all animal products except dairy)

## INDUSTRIAL STRENGTH GREASE CLEANER

GreaseGuard® is a high strength, liquid bacteria and enzyme product, specifically designed to breakdown and prevent build up of fats, oils, and greases commonly found in commercial greasetraps and drains. The unique consortium of grease degrading bacteria, coupled with concentrated enzymes is backed by independent research, and will help leave your grease trap clearer for longer while helping to control odour.

- ✓ Kitchen waste degreaser
- ✓ Bio-active formulation
- ✓ Odour control
- ✓ Biodegradable

Dosing Pump Option

## DIRECTIONS

For best results, dose directly into grease trap or into the plumbing immediately prior, using a dosing pump at a dose rate of 100mL per day per 300L capacity. The product should be metered after kitchen shutdown. Alternatively, the product can be manually poured in.

Each greasetraps is different and dose rates may need to be varied to achieve optimal results.

Parklink also provides dosing pumps that can be preset or adjusted to ensure your dosing is reliable.

Sometimes greasetraps will be undersized or there will be excess food scraps entering the trap. In both cases, the dose rate may need to be increased.

### Dose Rate:

**100 mL/day per 300 L of greasetraps capacity**

e.g. a 900 L greasetraps requires 300mL per day of GreaseGuard®

**GreaseGuard® is not hazardous according to the criteria of EPA New Zealand**
